Forecast for Saturday 09 Sep 2023

Weather: A mixed start to the day, with mist and shallow fog in some valleys. Any mist and fog will soon clear leading to another very warm day with light winds. Some various amounts of mid-level cloud will develop through the day, perhaps bringing the odd rumble of thunder and a slight chance of a heavy shower.

Chance of cloud-free hill tops above 600m: 90% initially but generally 95 or more after sunrise.

Low cloud and visibility: Poor in areas of mist and fog around dawn, soon clearing. Good to very good after sunrise, with uninterrupted panoramic views.

Forecast for Sunday 10 Sep 2023

Weather: Low confidence in detail surrounding heavy and potentially thundery showers. Another very warm start with various amounts of mid-level cloud and an increased chance of thundery showers through much of the day. Showers likely to be heavier during the afternoon and early evening, with a chance of downpours in places.

Maximum wind: Southerly 10mph but possibly up to 15-20mph with gusts 25-30mph under any heavy shower.

Chance of cloud-free hill tops above 600m: Near 100% but possibly falling to 60% late.

Low cloud and visibility: Generally good and certainly less hazy than recent days, though moderate at times under any shower. Perhaps becoming mediocre in places during the evening, with cloud base as low as 600m.

Temperature: **Valleys:** Plus 20 becoming 26 degrees Celsius.
At 600m: Plus 15 increasing to plus 20 degree Celsius.
Freezing level: Well above summits.
